Website Information

URL: <https://store.example/products/demo>
Scan Time: 16.09.2026, 12:00:00

Summary

Total Violations: 0
Total Cookies Found: 13

Notes

DEMONSTRATION ONLY. The company, URL and cookie observations are fictional; no website was scanned. This sample illustrates the current PDF export with company, recipient and notes filled in.

Scope: one product URL, a fresh session, followed by acceptance of optional categories. Two necessary cookies appear before the choice; eleven optional entries appear after it. Zero automated flags in this fixture is not a compliance certificate.

Reviewer recommendations: confirm each cookie purpose with its owner, compare disclosures with the inventory, then test Reject, partial consent and withdrawal separately. Retest the same URL after changing a tag or CMP setting.

Limitations: other pages, regions and authenticated journeys are outside this example. The names describe sample entries, not known vendor cookies. Cookie values are intentionally omitted.

Cookies Set Before Consent

1. **demo_consent**
Domain: store.example
Purpose: Necessary: stores the visitor choice
2. **demo_session**
Domain: store.example
Purpose: Necessary: maintains the demo cart session

Cookies Set After Consent
